

# HPE Networking Instant On 3.0 Value Proposition Summary

With the release of 3.0, Instant On furthers its mission to enable **business growth** with **innovative, easy-to-use, and secure** networking solutions that deliver **superior user experience** with unmatched value to businesses with limited IT staff

## EASE OF USE

Now even easier to view and manage your network with:

- Streamlined configuration
- Intuitive interface and improved flows
- Easy search function
- Common WLAN scheduler & mapping to SSIDs
- Step-by-step policy wizard
- 24hr site health to help prioritize maintenance

## EFFICIENCY

Automated intelligence drives operational efficiency with:

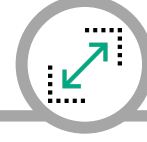

- Automated client classification
- Automated 6GHZ Smart Mesh support
- Automated site location on map
- Policy-based networking for consistent end-to-end network management
- Multicast traffic handling with IGMP Querier

## SECURITY

Experience enhanced security for operators and users with:

- Multiple new user roles with defined permissions
- Better control over actions that user admins can perform

## SCALE

Easily handle growth and more sites with:

- Modernized & intuitive UI
- Enhanced search functionality
- Larger network management teams, more user accounts per site
- Multi-site dashboard & map view
- Site cloning
- Read-only SNMP API access to 1960 switches in cloud-managed mode enabling multi-vendor 3<sup>rd</sup> party tools
