

ARUBA INSTANT ON & NORDVPN

Secure, Affordable Remote VPN For Home and Business Use

Attacks on IT systems present a major threat to consumers, and small and midsize businesses. Attackers continuously change their techniques to avoid detection, creating an evolving spectrum of vulnerabilities. While you can't prepare for every eventuality, and no one single security technology will provide complete protection, adding a VPN is a simple way of protecting on-line activities (encryption), enhancing privacy (anonymous browsing), and restricting access to undesirable content (url management).

NORDVPN

Setting up a VPN can be challenging which is why Aruba teamed with NordVPN, a trusted on-line VPN provider that powers more than 12 million users worldwide, to bring VPN services to Aruba Instant On customers. Founded in 2012, NordVPN is laser-focused on making VPN services simple, secure, and economical for consumers and business owners alike.

UNIQUE VALUE PROPOSITION

The joint solution offers many unique added-value capabilities:

- Works with any sized Aruba Instant On deployment, anywhere in the world, from a single access point in a home to a medium sized business;
- Discounted pricing when ordered via the Instant On app;
- 256-bit AES encryption, no tracking of visited sites, and high throughput for streaming;
- Optional ad blocking;
- Can be added at any time – does not have to be commissioned at the time of deployment;
- Multiple subscription plans from one month to multi-year.
